Subject: Information on California WWTFs
Attachments: CA major POTWs and Class 1 facilities.xlsx; Non-NPDES WWTPs not in EPA List.xlsx

Mr. Shriner,

Thank you for participating in our WDR Roundtable meeting. Unfortunately, we were very pressed for time and when it became evident that you were in the initial stages of your nitrogen reduction study, we needed to refocus our discussion. I hope when your study is completed that you'll be able to discuss it with the group.

You may recall that I offered to assist with identification of WWTFs in California. About a year ago we worked with USEPA Region 9 (Ms. Lauren Fondahl) on EPA's electronic reporting of biosolids. At that time the Regional Water Boards participated in development of a list of WWTFs that discharge more than 1 MGD to land. Ms. Fondahl had a list of the NPDES facilities, we were able to add the land discharge facilities. I hope this information will be helpful in your survey development tasks. Please let me know if you have any questions. If you have questions about the contents of the attached spreadsheets, you may contact Ms. Aide Ortiz.

Subject: RE: Spreadsheet previously provided to USEPA

Two spreadsheets:

"CA major POTWs..." is the list we received from USEPA

"Non-NPDES WWTPs..." is the list we sent USEPA (of facilities that weren't on their list)

Subject: Spreadsheet previously provided to USEPA

Aide,

I mentioned to the USEPA guy that we had a spreadsheet listing WWTFs. We prepared it for the USEPA biosolids reporting rule, and previously provided it to USEPA (but to the contact in Region 9). I'd like to forward that to the guy I cut off at the roundtable. Can you provide that spreadsheet to me?
